

HOUSE WALL REVISION 041010
1/2" Scale ... Document: 13" wide x 12" high

Sam, The house plan is the ground plan you drafted dated 2/11/10.

I have not given you dimensions, as I assume this will be an "as built" in the scenic shop. I am not certain what the finished wall heights are on the house as they were adjusted at GLSS to accommodate the house automation.

The wall texture, planks, paint treatment, etc. should match ... of course.

The trim around the shutter/sign is 1x2. The top is 1'3" from the top of the wall. The shutter is 2'6" x 4'0". However, note that the boards on top and bottom are staggered.

Hinges to match others on the house. Hook and eye to close the window.
